interferon alpha-I-1 precursor - horse

NiAlternate names: EqIRN-alpha-I-1; type I interferon
C;Species: Equus caballus (domestic horse)
C;Species: Equus caballus (domestic horse)
C;Date: 28-Dec-1987 #sequence_revision 28-Dec-1987 #text_change 09-Jul-2004
C;Accession: A24912
R;Himmler, A: Hauptmann, R:; Adolf, G.R.; Swetly, P.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          VGIHFS

E2 glycoprotein precursor - porcine transmissible gastroenteritis virus (strain FS772/7)

E2 glycoprotein precursor - porcine transmissible gastroenteritis virus (strain FS772/7)

N.Alternate names: peplomer glycoprotein, spike glycoprotein

C.Species: porcine transmissible gastroenteritis virus

C.Species: 30-Jun-1993 agequence_revision 30-Jun-1993 #text_change 09-Jul-2004

C.Accession: B43489; S11728

F. Britton, P.; Page, K. W.

Virus Res. 18, 71-80, 1990

A;Title: Sequence of the S gene from a virulent British field isolate of transmissible contraction number: A43489; MUID:91188698; PMID:1964522
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          gastroenteritis virus (strain Miller)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     A,Molecule type: mRNA

JO1719
E.2 glycoprotein precursor - canine coronavirus (strain Insavc-1)
N.Alternate names: spike glycoprotein
C.Species: canine coronavirus
C.Date: 17-Feb-1994 #sequence_revision 17-Feb-1994 #text_change 09-Jul-2004
C.Accession: 407119

AC0809
xanthosine permease [imported] - Salmonella enterica subsp. enterica serovar Typhi (stractions)
xanthosine permease [imported] - Salmonella enterica serovar Typhi
C;Species: Salmonella enterica subsp. enterica serovar Typhi
C;Species: Salmonella enterica subsp. enterica serovar Typhi
A;Note: this species has also been called Salmonella typhi
C;Date: 09-Nov-2001
A;Note: 09-Nov-2001
C;Accession: AC0809
